

Sawing Plant CSA 567

One solution for many applications

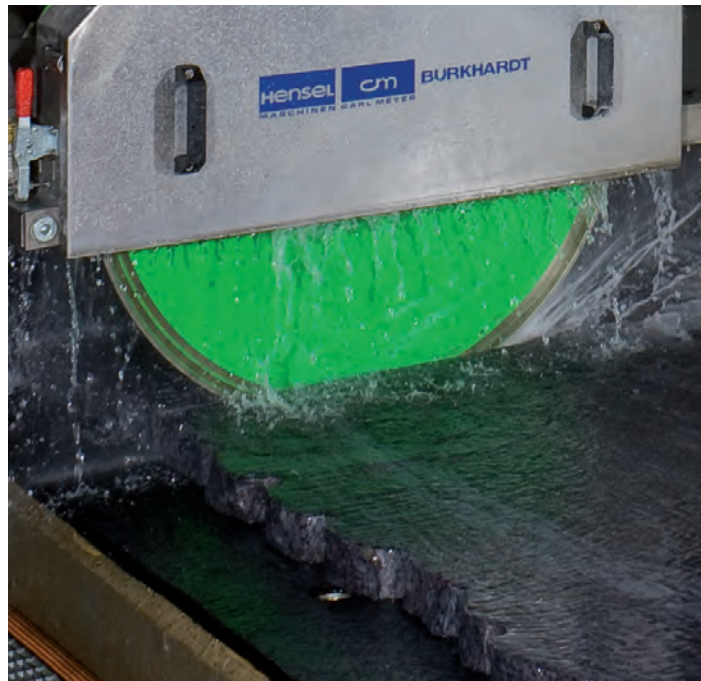

- *Bridge saw with rotary head for sawblade diameter max. 1200 mm and 90° swivel head*
- *The free useful working area can be customized to meet individual specifications*
- *Nesting of workpieces based on the slabs, which have been photographed while the machine produces.*
- *Workpieces up to 1.5 tons will be automatically manipulated by using suction cups arranged on the machine*
- *Massive workpieces and slabs, 5-axes processing of profiles, drilling, milling, etc. This is versatility with just one machine.*

*Due to the large working area and the automated non-stop running
this machine replaces even several standard bridge saws.*

*The machining of work-pieces of the most different thicknesses is
smoothly realizable in only one setting.*
