

Sawing Centre CSA 598 WJ

With additional tool slide for water jet cutting

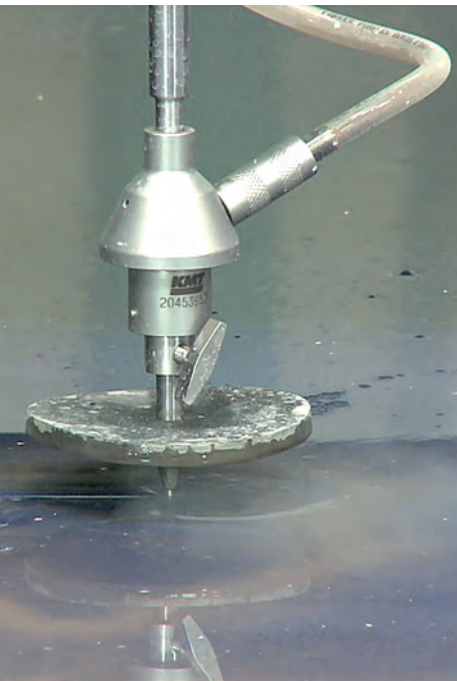

- *Unique combination of a high-performance bridge saw with 5-axes tool slide, high-precision water jet machine and automatic workpiece handling*
- *Sophisticated measurement technique ensures exact mitre cuts without compromise*
- *Workpiece nesting on slabs which have been photographed while the machine produces*
- *„Non-stop“-operation due to a rotating sawing belt table*
- *Much more than only straight cuts, there are no bounds on your creativity*

*Maximum utilization of material and fully automatic sawing process flow
by manipulating the workpiece with integrated vacuum suction cups*

*Economic work due to intelligent integration
of different production techniques*
