

## The 4<sup>th</sup> Bayreuth Technology Days scheduled to happen on 23<sup>rd</sup> and 24<sup>th</sup> April 2010 at BURKHARDT

The **4<sup>th</sup> Bayreuth Technology Days** (Bayreuther Techniktage) have been scheduled to take place on the 23<sup>rd</sup> and 24<sup>th</sup> April 2010 at Burkhardt in Bayreuth. The Hensel, Carl Meyer, SCHLATTER and ARBES Stone Processing Machines & Centres forming part of the company's range provide customized solutions for nearly all applications. Their designs allow the productive and effective processing of workpieces of natural and artificial stone.

Owing to the fact that no Stone Tec fair is to take place this year, Burkhardt will, now for the 4<sup>th</sup> time in succession, be presenting latest machine trends in the stone processing machine industry in its own plant and advise customers on all questions about financing and safety.

Guests and visitors may also inform themselves "**directly at the machine**" in Bayreuth about Burkhardt's

- Automatic High Performance Saw Plants **CSA 598** along with the corresponding water jet equipment;
- Automatic Edge Grinding and Polishing Machine **KSA 579**, a robust machine for the precise machining of edges;
- Automatic Surface Grinding Machine **FSA 561 WZW** with an automated tool changing facility for fully automated grinding;

and may have talks with the members of the Burkhardt Sales Team, who will be available to inform interested parties about the large range of machines offered under the brand names Hensel, CM Carl Meyer, SCHLATTER and ARBES. (See also [www.burkhardt-bayreuth.de](http://www.burkhardt-bayreuth.de) / Stone processing / Products ....)

Also you have the possibility **to visit** one of our nearby customers to see our **CSA 567** sawing plant and **BSS 600** horizontal wire saw in operation. Please inform us accordingly.

Safety at and around the machines is a highly interesting topic for machine builders and operators. Experts will give lectures on the state of the art regarding safety at and around machines and on the contents of the new EC Machinery Directive including its significance and the corresponding legal obligations. They will, beyond that, advise interested visitors on their individual concerns and requirements.

Grundler & Reiter Consulting GmbH will take charge of presenting some support programmes that have been designed to make it easier for middle class entrepreneurs and the trade to realize their planned investments and the installation of a modern machine train.

Some of our partner companies for software for the stone industry as well as tool manufacturers will take part also.

Guest and visitors will, as usual, extensively be entertained and cared for on both days. The old Margravian City of Bayreuth provides, beyond that, an attractive additional programme including visits to castles, the historic hermitage park, dreamy grottos and water gardens, the festival hall with its unique acoustics and to a large number of interesting museums.

Bayreuth, February 2010  
Burkhardt GmbH
