

## 4th Bayreuth Technology days

took place on the 23rd and 24th April 2010 at company Burkhardt in Bayreuth.

Burkhardt – supplier of high quality Stone Processing Machines and Concepts - presented various machines and plants, such as

- Automatic Edge Grinding and Polishing Machine KSA 579
- Automatic Sawing Plant CSA 598 WJ
- Sawing Plant CSA 567
- Automatic Surface Grinding Machine FSA 561 WZW

Each exposed machine was completely mounted and ready for dispatch to customers in the countries of Germany, Australia, United States of America and to the Netherlands.

The visitors also had the possibility to see Burkhardt's sawing plant CSA 567 as well as the horizontal wire saw BSS 600 in operation at their customer's workshop, Messrs. Gräf Granit in Höchstädt. Burkhardt drove the guests from Bayreuth to Höchstädt where they were informed live on site about the possibilities of modern production equipment and the productivity raised with it.

The business partners: DIETRICH, SEKON, HEGLMEIER, TYROLIT, DIABÜ, LAP LASER, ABRESSA and Hummel GmbH exposed in Bayreuth their software and tools as well as additional equipment directly at our machinery for the stone industry.

Different lectures on current subjects enriched this year's BURKHARDT technology days:

Dipl.-Ing. Ulrich Kretschmer of the "BG Rohstoffe" and chemical industry explained the "Security in stone processing machines" and the new "machinery directive (MRL)" and was available for a personal counselling interview.

BURKHARDT presented their answers on the requests of the renewed directive in a separate booth.

The Grundler & Reiter Consult GmbH gave lectures on financing possibilities for small business companies like refinancing programme and guarantee programmes of public financial institutions (KfW and LfA), factoring, leasing, sale and lease back, fine trading, off-balance financing, venture capital and mezzanine capital, and delivered explanations and recommendations for the credit standing assessment in the middle class (proactive information policy with banks and creditors as well as rating and criteria).

With this programme the Bayreuth machine manufacturer BURKHARDT offered to his guests an interesting event and an extensive consultation for their projected investments.
